

## Custom Utility Trailers

### Custom-built Transportable Filtration Trailers for in-the field Oil Maintenance Jobs

- Load Tap Changers
- Transformers
- Oil Circuit Breakers

### Industry Leading Enclosed or Open Air Trailers Controllable Flow Rates up to 60 GPM Single or Multiple Custom Tank Volumes

- Double-Walled Tanks in Carbon or Stainless Steel
- Can be used for Temporary Storage of Unfiltered or Clean/New Oil

### Built-in Oil Containment Berms to Collect any Spillage

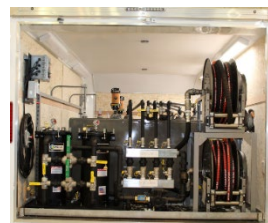

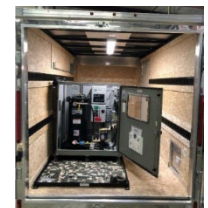

- High- and Low-Pressure Shutoffs
- Automatic Shutoff to Prevent Overfilling Reservoir Tanks

### System Instrumentation & Protection Schemes

- Digital Flow Meter for determination of Desired Flow Rates
- Paddle Wheel Sight Glass for Visual Flow Display
- Optional Moisture-in-Oil Sensor for real-time measurements in PPM and Relative Saturation
- E-STOP pendant for emergency shut-off

### Single or Multiple Filter Canisters

- Multiple Canisters can be Operated in Series or Parallel or Independently
- Easily Switch from Particulate Filtration to Water Filtration
- Accepts Filter Media for Particulate, Water, pH Correction, and Dissolved Gas Removal

### Additional Accessories and Upgrades

<p><b>Moisture-in-Oil Sensor</b></p> 	<p>Detects moisture content in oil and provides PPM and Relative Saturation levels</p> <p>*Different models available</p>	<p><b>Hose Reels</b></p> 	<p>Single or double hose reels with industry specific hoses.</p> <p>*Reels can be stacked</p>
